

BPH SYMPTOM SCORE INDEX QUESTIONNAIRE

Having to urinate more frequently, as well as more urgently, can definitely interrupt the flow of your day. You should know that frequent urination is often a symptom of benign prostatic hyperplasia (BPH), a noncancerous enlargement of the prostate gland. BPH is a common condition among men over the age of 50. Waking up several times a night to urinate and having a weaker, slower, or delayed urine stream are other common symptoms.

Circle the number that best applies to you

Patient Name _____

DOB _____

Date _____

	Not at All	Less than 20% of the time	Less than 50% of the time	50% of the time	More than 50% of the time	Almost always
